

# NNA Research Experience for Undergraduate Students

Increase your confidence and skills with science research! **Paid** virtual research experiences are available for Alaska undergraduate students interested in Arctic science and climate change!

Students will work with research faculty and Alaska communities to pursue authentic research questions to equitably generate knowledge about the natural and built environments, cultures, and communities of the Arctic.

- Professional development in research & data analysis, science communication and academic & career prep in the geosciences
- Networking opportunities with scientists and peers
- Graduate credit from Univ. of Colorado
- \$1800 for 120 hours of work time

**Interested in applying?**  
**Applications due Nov. 27th, 2023:**
